

AccessEnforcer™

AccessEnforcer™ is Calyptix Security's premier line of all-in-one security appliances designed especially for small and medium size businesses (up to 250 users) that have limited IT budgets and limited access to network security specialists.

Eliminate the pains of multiple subscriptions, integrating multiple components and IT complexities. AccessEnforcer is available with all features for a single price with no hidden charges or seat licenses and automatic updates and feature enhancements. Best of all, Calyptix provides reliable and timely support through quick access to top level network and security engineers.

So Much More Than Just a Firewall...

Powerful Spam Filter

Web Filter (that integrates with Active Directory)

Reliable Automatic Updates

PDF Reports (without additional software/hardware)

Multi-WAN Technology

Military-Grade Security

Extremely Secure Foundation (Open BSD)

Easy to Use.

AccessEnforcer is extremely easy to deploy, activate, change settings, and maintain. By combining a robust hardware appliance with an intuitive web based user interface, Calyptix has made it extremely simple to design and implement highly secure small business networks, providing for comprehensive security and effective network visibility and control.

Comprehensive Security

AccessEnforcer combines all the state of the art perimeter and proactive security engines necessary for a small and medium business to secure the edge of its network, data and IT resources from a wide array of security threats, including viruses, worms, spyware, spam, network attacks, exploits, scans, and more.

Active Directory Integration

Through seamless integration with Active Directory including on your Microsoft Small Business Server, AccessEnforcer provides quick and easy set up and precise control of users, groups and machines. AD integration saves valuable time, automates changes and provides reporting for users by name.

Eliminate Complexity & Costs

AccessEnforcer is loaded with a comprehensive feature set, unlimited seat licenses and an automatic firmware update service that eliminate the complexities and hidden costs of implementing comprehensive security.

Reporting

AccessEnforcer delivers automatic PDF reports (with user names) by email each day, week, and month that cover vital network and security information. Activate reports with a click of the mouse. No additional hardware, software, or fees are required.

Accelerate Troubleshooting

AccessEnforcer provides comprehensive diagnostic tools, including a packet analyzer and real time traffic logs, to accelerate network troubleshooting and analysis.

Dedicated Support

At Calyptix you will find a dedicated support team made up of experienced support engineers who pride themselves at going the extra mile to resolve issues. Our engineers are well-versed with Microsoft's Small Business Server and other applications vital to small businesses and the IT professionals that support them.

Hear What Customers Have to Say...

"AccessEnforcer stands above the crowd of UTM devices in the SMB space. It is **easy to manage** for daily use and still gives us flexibility for complex configurations in some of our SMB customers. The **integration with Microsoft's Active Directory** is a key feature in our customer environments, and allows us to effectively implement network policies just like enterprise environments but at **a fraction of the cost and complexity.**"

Kevin Royalty, Microsoft MVP for SBS and Managing Partner of Total Care Computer Consulting

"I wanted **control of my network** settings and parameters — and I got it! Product functionality of the AccessEnforcer at **this price point is phenomenal...**

Cole Brand, Talon Technical Sales

"AccessEnforcer has a tremendous feature set right out of the box. Its integration with Active Directory is easy..."

Jason Harrison, Harrison Technology Consulting

"I am certain that **the AccessEnforcer has more than paid for itself... it is definitely worth it even for a small company such as ours.**"

Stuart A., Mac enthusiast

"We plugged it in, set it up, and it has been running effectively every since."

Matt Spangard, Enventys

"Our client asked us to evaluate their network infrastructure to enhance and update several critical functions: firewall, spam filtering, web filtering, and remote access. After carefully presenting the alternatives, our client chose the AccessEnforcer which provided everything they needed and generated tremendous savings on hardware, annual subscriptions, management time and power. **We cut cost by over 48% and simplified everything.**"

Mark Wertz, NetSouth

2011 AccessEnforcer Hardware Models

	AE750	AE1000	AE2200	AE3200
Firmware	3.0 (or later)	3.0 (or later)	3.0 (or later)	3.0 (or later)
Users*	Up to 20	Up to 35	Up to 75	Up to 250
Form Factor	Desktop	Desktop	1U	1U
LCD Control	None	None	Yes	Yes
HDD	80GB	80GB	160GB	160GB
Interfaces	4-10/100/1000 mbps	4-10/100 mbps	1-10/100 mbps 6-10/100/1000 mbps	1-10/100 mbps 6-10/100/10000 mbps
Throughput**	75 mbps	95 mbps	200 mbps	300 mbps

*No user license restrictions. Number is recommended number of users based on average use.

**Throughput estimates reflect all security filters running in a lab environment. Actual results will vary.
